Over Pressure

Clean Room High Speed Doors (Self-repairing)

- Heavy duty automatic flexible door featuring special and innovative self-repairing system; should the curtain accidentally get dislodged, it automatically be recovered with a simple opening and closing operation.
- High door efficiency & low permeability values EN 12426 EN 12427 : $12\text{m}^3/\text{m}^2\text{h } \Delta 50 \text{ PA}$.
- Heavy duty motor : 230V three phase, opening speed upto 2.0 m/s with inverter system.
- Operating speed and superior sealing properties improve traffic flows and provide environmental control and savings on energy costs.
- Concept of low air permeability in pressurized rooms with positive and negative air pressure.
- Size upto: 4000 mm (W) x 4000 mm (H).

Filtration Media & Solutions

Filtratech Solutions offers Advance Filter media Solutions to Reduce Drying time and Powder losses.

Features:

1. We have full Integration from Yarn Processing-fabric weaving -fabric processing to Final Customised products (Stitched / US welded Type)
2. We Follow GMP Procedures & provides SGS Approved "Food Grade Certification" for filter fabric.
3. Our fabric have finest Particle Retention Capacity and high Air permeability.
4. We provides High Performance fabrics with Excellent Material Discharge Property.
5. Our Fabric Provides Excellent Protection against Explosion, with High Conductive Fabric Quality.

API Growth

Rising prevalence of chronic diseases such as cancer and cardiovascular diseases (CVDs), presence of several medium to large API manufacturers, and increasing focus of government on the development of pharmaceutical manufacturing sector are some of the factors that are boosting the country's API market

Wednesday, 30 November 2022

TIME

PRESENTATION AND SPEAKER(S)

Sustainability & Indian Pharma : 360 Degree Focus

Sustainability has emerged as a pervasive priority across the pharmaceutical value chain. Indian industry is no exception and the quest for sustainability is being pursued by corporate leaders across functions.

Within the upstream realm, industry is pursuing cleaner approaches for API production including examples such as enzymatic bio-transformation in API. Effluent and waste is a focus across the API and pharma value chain and continues to provide significant opportunity for sustainability led initiatives. Manufacturing operations power efforts in the middle. Energy efficiency and overall focus on carbon footprint is driving significant change across operational footprint. Finally, transformation in packaging and supply chain is the last straw. Several initiatives have already been implemented in packaging across both domestic market products as well as exports. Supply chain and cold chain innovation is also true across product and market segments.

The panel will converge diverse perspective across leaders in Indian pharma to spotlight the breadth of sustainability led initiatives in Indian pharma and ideate way forward for transformative impact.

01:00pm - 01:45pm

Pushpa Vijayaraghavan, Director,
Sathguru Management Consultants

Appasaheb Kabadagi, Head Site Operations,
Alembic Pharmaceuticals Limited

Dock Levelers

With robust construction & state of the art hydraulics, Gandhi Dock Levelers are built to last

- Robotically welded platform and lip in almond anti-slip ST52 steel.
- Side foot protection steel guards.
- Tilt facility allows Dock Leveler to compensate for canted condition on either side upto 120 mm.
- Safety stop in case of accidental departure of the vehicle.
- Single effect lift cylinder, double effect lip cylinder.
- Sturdy integral maintenance strut to support Dock Leveler during maintenance checks.
